COMMENTS:

For questions on completing the estimate worksheet, contact your sales consultant.

This is an estimate worksheet only. (Not a contract to purchase) In the event this becomes a purchase any changes should be made using the revision to estimate worksheet 1239R.

In good faith and representing a serious interest in obtaining building materials from manufacturer, we would like an estimate based on the following information along with the building description per document 1239A and 1239B.

Once a signed order is received complete with the deposit, the order is defined as one of two options (check one).

- Option #1: "Approval" order typically used when a customer is requesting permit verification, expects delays, and is unable to commit to a delivery request. The drawing order does not "lock in" any particular pricing and is subject to market escalation costs.
- Option #2: "Production" order an accepted project that will flow through the design process, manufacturing and delivery without delays. Delays by buyer will make the order subject to price increases as in option #1.

- Priority 26 Ga 24 Ga
- Premium 26 Ga 24 Ga
- 6" Integrated Soffit
- Base Trim
- Other: _____
- Trim Color: _____

Notes

- 1) F/O's for bi-fold, stack or slider doors require manufacturer specifications.
- 2) Please locate all overhead framed openings (F/O), walk doors, window framed openings, roof framed openings and lean-to's, on drawing. Include dimensions.
- 3) For walls that are to remain open, please indicate if and where bracing can be located.
- 4) Indicate any existing structure (within 20ft of new building) on Form 1239C.

Insulation:

Roof: Type: _____ Thickness: _____

Wall: Type: _____ Thickness: _____

Estimate Worksheet – Form 1239C

BUILDING AND SITE FEATURES INFORMATION

Existing Building

- a) **Please provide floor plan and elevation of existing building(s) and its location in relation to the new proposed building including: roof pitch, distance to ridge, and eave height. Clearly indicate ridge orientation of existing building to new building.**
- b) **Locate new building on floor plan and appropriate elevation drawing(s).**
- c) **Clearly indicate the distance between the new & existing building(s) (distance of 20' or less may cause snow drift).**
- d) **Indicate PO number of existing building if applicable.**
- e) **Indicate if sheeting, girts, columns and bracing are acceptable at common wall(s) with existing building.**

Estimate Worksheet – Form 1239D

If possible, please supply the crane data sheet from the supplier. If not, please fill in the following information:

CRANE DATA INFORMATION SHEET

- a) Fill in dimensions. See Form 1239-INST, Page 11 for definitions.
- b) Indicate type of crane: top running (supported by column), underhung (hung from rafter above), or monorail (hung from the rafter).
- c) Indicate if top running crane will be supported by the rigid frame column or a separate column.
- d) Indicate on form 1239B the location of the crane and the crane travel distance.

Underhung Crane

Crane Type (circle one):

- a) Top Running
 - i. Single Girder
 - ii. Double Girder
- b) Underhung
- c) Monorail (Provide sketch with location on form 1239B)

Crane Capacity: _____ (tons)

CMAA Classification (circle one)

- i. Class A (infrequent service)
- ii. Class B (light service)
- iii. Class C (moderate service)
- iv. Class D (heavy service)

See page 11 of Instructions for further information on CMAA Classification

Please provide the following information:

A: Crane span _____ ft.

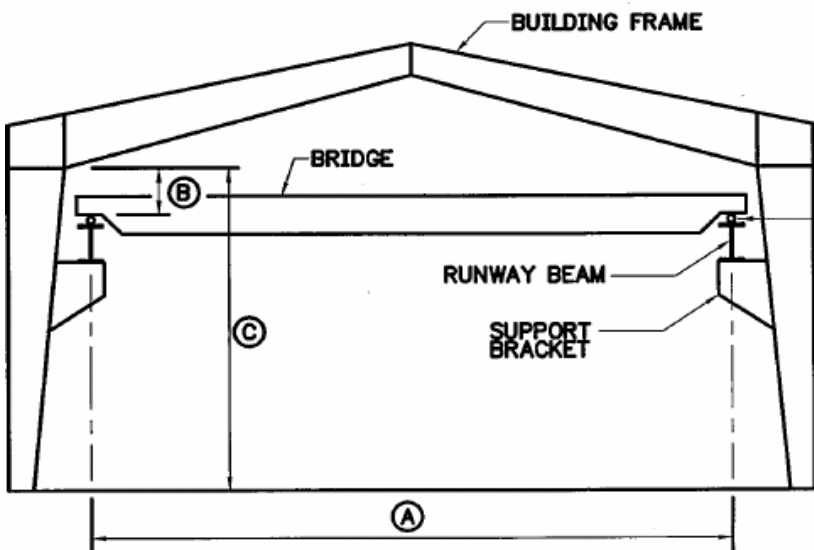

B: Clearance

Under the rafter to top
the rail _____ ft.

C: Clearance

under the rafters _____ ft.

If there are two cranes provide
minimum distance between the
cranes _____ ft.

Top Running Crane
